

Product Designer | Scalable UX and Interaction Systems

Senior Product Designer specialising in systems thinking, scalable design systems and complex digital products across web and mobile platforms. I design end-to-end product experiences spanning product strategy, UX architecture, interface design, design systems and developer collaboration.

My strength lies in simplifying complex workflows into intuitive, scalable products that balance user needs, business goals and technical constraints.

M&J Productions

Jul 2023 - Present

I lead product design across gaming and gambling platforms, working closely with developers to create scalable, polished experiences in fast moving environments.

- Led product design across gaming and betting platforms, designing scalable systems and product experiences across web and mobile.
- Led complex product initiatives from discovery and UX architecture through to production delivery.
- Built reusable design systems, component libraries and shared product patterns that accelerated delivery and improved consistency.
- Partnered closely with engineers to balance user needs, business goals and technical constraints.
- Leveraged AI-assisted workflows to rapidly prototype, iterate and scale frontend systems and component architectures.
- Contributed to product strategy, go-to-market thinking and platform growth.

Non Fungible Labs

Jun 2022 - Jul 2023

Designed and shipped cross platform experiences across Web3 and gaming products, building scalable systems and working closely with engineers and product teams to deliver at speed.

- Designed mobile and web interfaces using a systems first approach focused on clarity, scalability, and performance.
- Built and maintained scalable component systems that enabled faster iteration and improved consistency across products.
- Delivered production ready UI with clear user flows, polished interactions, and scalable interface patterns.
- Worked closely with engineers and product leads to refine features, improve usability, and ship continuously in fast moving environments.

Skills

- Product design
- Product Strategy
- Design Systems
- Interaction Design
- UX Architecture
- Information Architecture
- Component Libraries
- Systems Thinking
- Prototyping
- Frontend Collaboration

Tools

- Figma
- Slack
- Framer
- Git
- AI Development Tools

Working Style

- End to end design
- 1:1 with devs
- Fast iteration
- Detail-focused
- Owns UX flows

Foundation Digital

Jun 2021 - May 2022

Worked across marketing websites and early stage digital products, designing in Figma and building production ready Webflow experiences. This role strengthened my understanding of responsive design, layout systems, and fast paced team collaboration.

- Designed and shipped marketing websites and early stage digital product experiences across web and mobile platforms.
- Created UX flows, reusable components, and scalable UI systems that supported rapid iteration and consistent user experiences.
- Built responsive Webflow websites directly from Figma with strong attention to layout precision and implementation quality.
- Managed multiple projects simultaneously across fast moving timelines while maintaining strong attention to detail and delivery quality.

Skills

- Product design
- Product Strategy
- Design Systems
- Interaction Design
- UX Architecture
- Information Architecture
- Component Libraries
- Systems Thinking
- Prototyping
- Frontend Collaboration

Freelance Design

Oct 2020 - Jun 2021

Worked with startups and small businesses to design and deliver digital products, marketing websites, and brand systems from concept through to launch.

- Designed responsive websites, brand identities, and early stage product prototypes across a range of digital and e commerce projects.
- Worked directly with founders and developers to turn early product ideas into functional MVPs and scalable digital experiences.
- Balanced UX clarity with strong visual design, interaction quality, and clear product storytelling.
- Gained experience working across entertainment, lifestyle, e commerce, and early stage digital products in fast moving client environments.

Tools

- Figma
- Slack
- Framer
- Git
- AI Development Tools

Working Style

- End to end design
- 1:1 with devs
- Fast iteration
- Detail-focused
- Owns UX flows
